Commercial offer

Since 2014, the open joint-stock company Mozyr Woodworking Plant has been specializing in the production of a unique, innovative, environmentally friendly product - insulation boards made of wood fiber BELTERMO.

The coefficient of thermal conductivity of "BELTERMO", depending on the type of board, varies within the range of 0.039-0.047 W/mK, which means that the boards "BELTERMO" can be successfully used as a highly effective insulation for any buildings and premises. In addition, the material is windproof, provides excellent moisture and sound insulation.

OJSC "Mozyr DOK" produces heat-insulating boards with a density of 110 kg / m³ to 200 kg / m³, they can be ordered in the required size, with a profile (tongue / groove, step) or straight edge. The maximum width and length is 2.85 m, the thickness varies from 20 to 240 mm. Due to its natural origin, BELTERMO has a reputation as a "breathable" material that helps maintain a healthy microclimate in all rooms.

Products are manufactured according to the code: 4411941000.

All products of OJSC "Mozyr DOK" are high-quality environmentally friendly, meet the requirements of international and European standards, and are produced from certified wood, which is confirmed by the presence of the FSC, ISO 9001, ISO 14001, CE certificates.

The company offers flexible terms of cooperation with an individual approach to each customer. A system of discounts is applied depending on the volume of purchased products.

Shipment is made on FCA terms.

Customs clearance of products is carried out at the expense of the enterprise.

We look forward to long-term cooperation!
