

MASK MEDICAL ONE-TIME MMO series

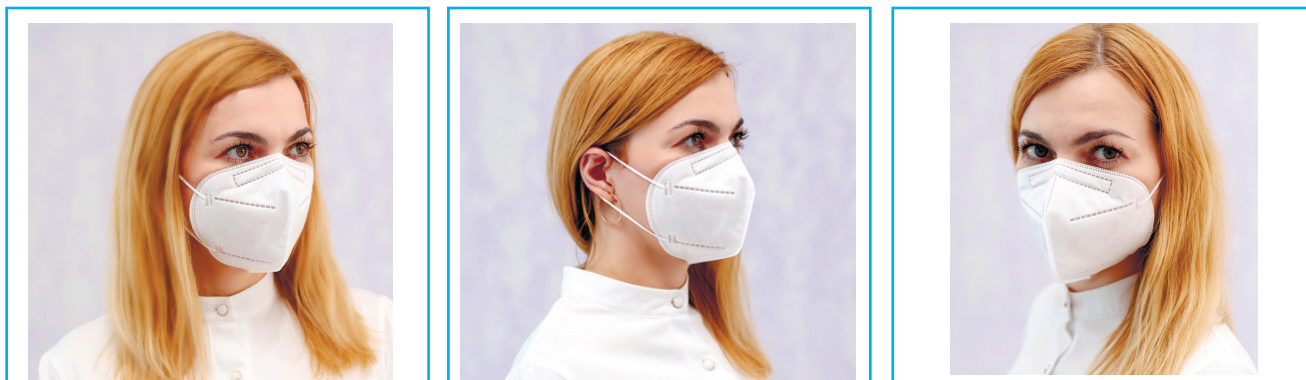

SCOPE DESCRIPTION

MASK MEDICAL ONE-TIME MMO series

(further - a mask) it is intended for restriction of transfer of infectious agents from personnel to patients in medical rooms of the general profile and also can effectively promote reduction of an exit of infectious agents from a nasal and oral cavity of the asymptomatic carrier or the patient with clinical symptoms.

The mask is calculated for use in medical rooms of the general profile for full protection of handling medium against drop pollution by allocations from a nasal cavity and a throat during during medical procedures.

The mask is intended for single (one-time) use during one change (no more than 8 hours, depending on service conditions).
